Disclaimer

Crypto trading is highly speculative in nature which can mean crypto prices may become extremely volatile. You may sustain a total loss of your funds . Crypto trading carries a high level of risk and may not be suitable for all investors. Always consult a financial professional (advisor, planner etc.) before making any investment decisions. It is possible that you will sustain a loss of some or all of your initial investment so never risk capital that you cannot afford to lose. No representation is being made that any account will or is likely to achieve profits or losses. Past performance is not indicative of future results. Individual results vary and no representation is made that clients will or are likely to achieve profits or incur losses comparable to those that may be shown. You acknowledge and agree that no promise or guarantee of success or profitability has been made between you, and Dan Hollings and the Crypto Masters team.

The British man who accidentally threw away a computer with 7,500 bitcoins on its hard drive has come up with a new plan to retrieve his lost coins from the city landfill. “We estimate there are between 300,000 – 400,000 tons of waste to look through,” he said.
